

Falco Systems

Biometric Systems

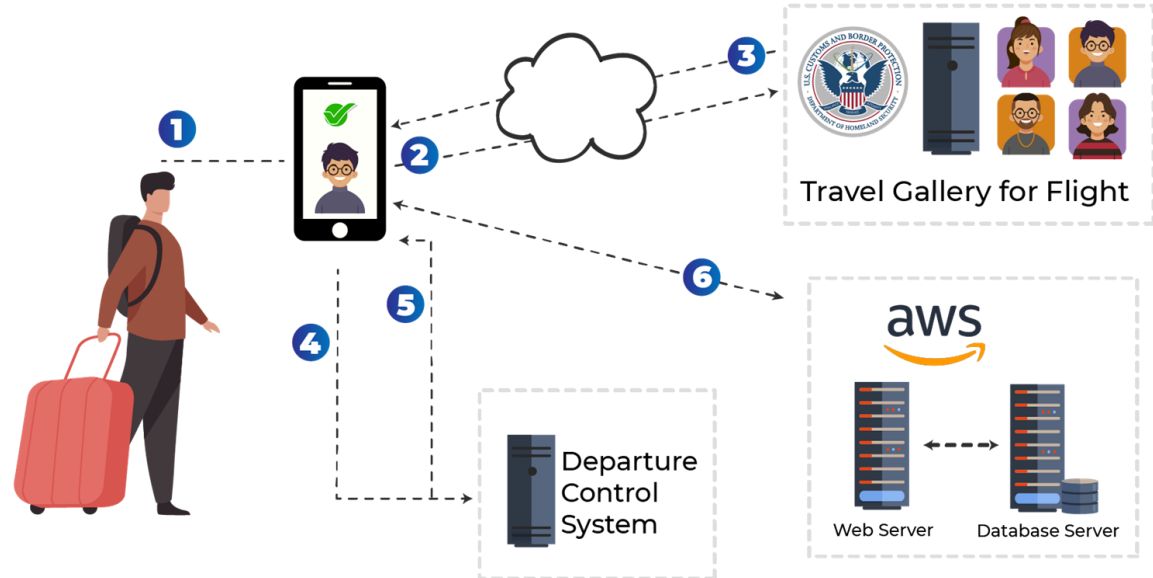

How Does it work?

Falco Systems

Process – One Step

1. Picture is taken
2. Data is sent to CBP
3. CBP returns match
4. Passenger ID is sent to Airline DCS
5. DCS returns data
6. Transaction is logged in AWS

Why Biometrics?

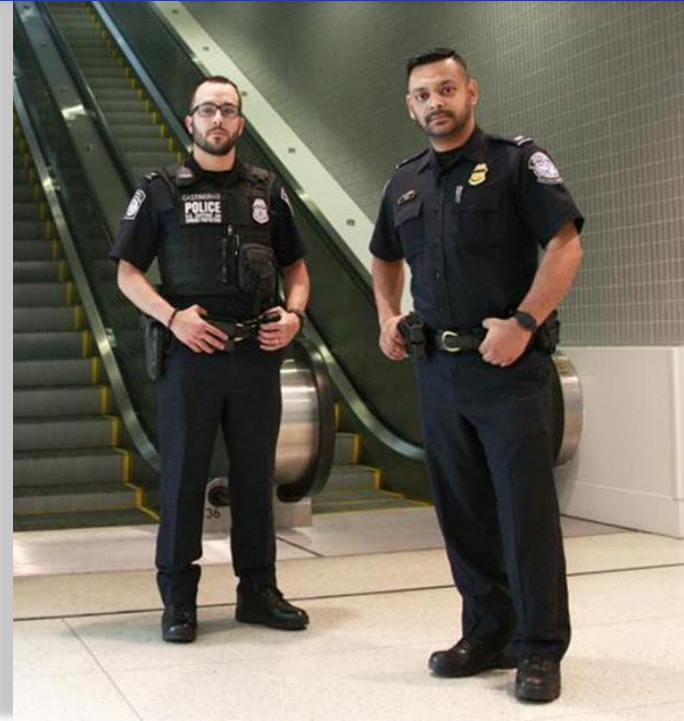

Congress passed legislation that added biometric requirements for tracking travelers

Falco Systems

Custom & Border Protection

- Going through the facial recognition process is required for inbound international visitors
- It's being used for international departures at various airports.
- Eventually CBP may make it mandatory for outbound travelers
- Is your airport ready?

Plan Ahead

•Don't improvise at the last minute!

The Falco Systems Advantage

Feature

Nonproprietary, off-the-shelf hardware

Developed with Open –Source technologies

No risk POC

Acquire through your existing hardware & software vendor (*)

() In talks with vendors*

Maintain it through your existing maintenance vendors (*)
